

accutest laboratories. it's all in the chemistry™

we've built our reputation on  
great chemistry.

OUR DEDICATION  
TO EXCELLENCE IN  
CHEMISTRY IS THE  
FOUNDATION OF  
OUR REPUTATION.  
WE WILL ACCEPT  
NOTHING LESS.

In 1956, Accutest began as a small analytical laboratory. Our focus then was on providing our clients with a superior brand of chemistry, both in the lab and in one other critical area—Client Service. Today, while Accutest has grown in size, locations, people and technology, our focus is still the same. Our dedication to chemistry has made us one of the leading, most reliable, and fastest growing environmental testing laboratories in the country.

At Accutest, our commitment has always been to be more than just a vendor to our clients. We strive to be a partner, a dedicated team member that will interact with both your technical staff and project managers to ensure performance and data of the highest quality. And we do this every day, on every project and on every test. We bring our clients an expertise in water, soil and air testing that consistently meets or exceeds the most stringent regulatory requirements in the environmental industry.

our network brings us **closer** to  
our clients.

WE BELIEVE THAT  
OUR DEDICATION  
TO TECHNOLOGY  
AND OUR ABILITY TO  
BRING BOTH OUR  
PROFESSIONAL AND  
TECHNICAL TEAMS  
CLOSER TO OUR  
CLIENTS WILL  
CONTINUE TO  
ADVANCE ACCUTEST  
AND ENHANCE OUR  
LEADERSHIP POSITION  
WITHIN THE  
ENVIRONMENTAL  
TESTING INDUSTRY.

A key component of Accutest's commitment to our clients is accessibility. Our growing network of laboratory locations in the Mid-Atlantic, New England, Southeast, Gulf Coast, Mid-West and West Coast regions ensures that our dedicated staff will efficiently and effectively meet the analytical demands of our clients. Our regionalization philosophy enables Accutest to conveniently service industrial, engineering/consulting and government clients on a national basis.

We offer our clients a diversified menu of environmental testing capabilities to meet their most demanding requirements for water, soil and air testing. Accutest is fully equipped and staffed to meet the analytical, data management and service-related needs of our clients.

Accutest also brings an extensive array of accreditation and certification to every project. Our accreditations include NELAC, The US Army Corp of Engineers, and the US Naval Facilities Engineering Service Center, as well as individual state certifications.

# merging technology and client service into a powerful partnership model.

THIS PHILOSOPHY  
HAS BEEN PIVOTAL  
IN ACCUTEST  
BECOMING ONE  
OF THE LARGEST,  
MOST TRUSTED, AND  
FASTEST GROWING  
INDEPENDENT  
ENVIRONMENTAL  
LABORATORIES IN  
THE COUNTRY.

The success of Accutest has always been based on our strength of chemistry, both on a technical and personal level.

Our investment in technology is driven by our demand for quality and performance. Proof of our dedication to technological excellence can be found at our newly expanded laboratories and corporate headquarters. These additions provide Accutest's clients with over 160,000 square feet of state-of-the-art laboratory capacity.

Our philosophy has always been to provide our clients with accurate, reliable and legally defensible analytical data. Over the past 50 years, we've built our reputation on these fundamentals, as well as integrity and direct, honest communication. Our goal is to consistently build long-lasting, valued client relationships and be a valued team member in your environmental program.

### **The Chemistry of Our People.**

Sound technical chemistry is essential in order to meet our clients' demands, but it is the chemistry between our people and our customers that makes for a true trusting partnership. Our growth is a result of our dedication to excellence. This is evident in both our commitment to provide state-of-the-art technology and the first-rate skills and professionalism of our staff, who consistently meet and exceed client expectations every day. Going the extra mile is the standard at Accutest. Our continued success demands it of all of us!

### **Committed to the ongoing application of excellence!**

As a leader in Environmental Testing, Accutest has established procedures and Quality Assurance programs that meet and often exceed the compliance standards of applicable federal, state or project-specific guidelines. We deliver reports and results on time and actively participate in independent quality audits associated with national corporate and federal programs. Our corporate goals allow for nothing less than total client satisfaction and an unmatched level of quality.

# LabLink<sup>SM</sup>

the industry's leading data management tool  
and the true measure of  
client accessibility.

Information is power! Accutest clients understand this because they have access to the most powerful data and information retrieval tool in the environmental testing industry: LabLink.<sup>SM</sup>

LabLink is Accutest's online, password-protected data management tool that gives each client virtual access to all of their test data—24/7/365—from any PC with Internet access. Users can check their test results at any time to get real-time information. With LabLink you'll have the ability to generate online reports, query historical data, check current billing information, auto-email reports, generate electronic deliverables (EDD's) on demand and much more. Quite simply, LabLink is the most powerful and responsive information tool in the industry—and one that no other environmental lab can offer. And it's free to all Accutest clients.

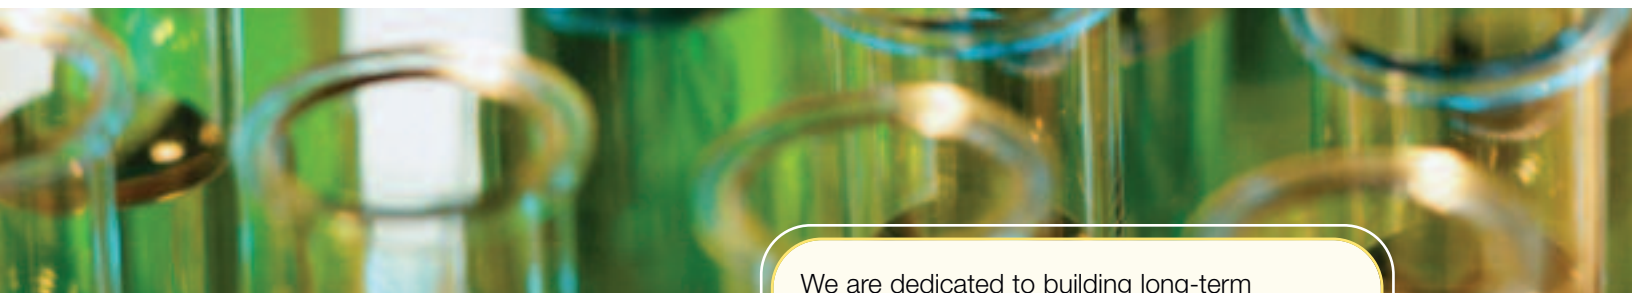

Accutest operates on one of the most technologically sophisticated Laboratory Information Management Systems (LIMS). Our automated LIMS virtually eliminates errors associated with manual data and test-result keying—further assuring consistent data integrity.

At Accutest we continue to break new ground in data management technology by constantly “raising the bar” and improving our systems to maintain the highest standards in the industry.

OUR DATA IS  
THE LIFEBLOOD  
OF BOTH OUR  
BUSINESS AND,  
MORE IMPORTANTLY,  
OUR CLIENTS'  
BUSINESS.

building business relationships  
is all in the chemistry.

We are dedicated to building long-term relationships with our clients. We simply do not believe in a “*here today, gone tomorrow*” philosophy. Instead, we bring our long history of experience, dependability, integrity, quality, responsiveness and professionalism to every client. Our standards of technology exceed industry norms, and our commitment to service is woven into the very fabric of our company.

We look forward to discussing your environmental testing needs and expectations. There are certainly other laboratories you can talk to, but there are none that can bring you the depth of chemistry and technology you will find at Accutest. We invite you to call us for more information or visit our website at [www.accutest.com](http://www.accutest.com)
