

**THE ENVIRONMENTAL TESTING LABORATORY WITH  
TOTAL PERFORMANCE YOU CAN COUNT ON**

SGS ACCUTEST IS NOW PART OF SGS, THE WORLD'S LEADING INSPECTION,  
VERIFICATION, TESTING AND CERTIFICATION COMPANY.

# SGS ACCUTEST

## TOTAL PERFORMANCE YOU CAN COUNT ON

---

Selecting an environmental testing laboratory can be a daunting process. You need a partner that delivers consistently reliable data quality as well as outstanding service every step of the way. In short, you need total performance. At SGS Accutest, that's precisely what we're committed to providing.

SGS Accutest offers what many of our competitors can't – the resources and experience of a large company with the personal, hands-on support of a smaller one. From sample collection, to data analysis and storage, SGS Accutest delivers an impressive breadth of services driven by the latest technology. Through our rigorous quality assurance and analytical programs, we ensure consistent, reliable support across our national network of laboratories, service centers and certifications.

Through the National Corporate Environmental Program, SGS Accutest uses a systematic approach to deliver consistent, quality laboratory services nationwide for clients requiring services in multiple locations throughout the United States.

It's a global approach to excellence that makes environmental testing easier whether you're in the lab or in the field.

You count on SGS Accutest for:

- Responsiveness – our high-integrity data is delivered in a timely manner
- Superior performance – in the field or in the lab
- Comprehensive support – from a national network of state-of-the-art laboratories and service centers
- Leading-edge technology – including our LabLink® data delivery system
- Expertise – technical experts in a variety of disciplines are available to help solve your problems
- Unsurpassed value – competitive price with a wealth of value-added services

## PROFESSIONALS WHO INCORPORATE QUALITY AS AN INHERENT JOB ELEMENT

Consistent data quality is vital where the analytical testing of air, soil and water samples is concerned. At SGS Accutest, we continually invest in fine tuning and improving the quality system.

Our tradition of delivering high-integrity data is one we live up to at every phase of your project.

In our state-of-the-art facilities, computerized instrumentation assures that samples are analyzed quickly and efficiently. And, our technical experts are always seeking out new and emerging technologies to increase laboratory efficiency and improve data delivery.

Our commitment to quality is reinforced through a stringent Quality Assurance Program, which provides us with continual feedback on data quality and operations. This enables us to identify systematic issues requiring corrective action that result in continuous process improvement – further underscoring SGS Accutest’s commitment to excellence.

SGS Accutest’s comprehensive approach to quality management is the basis for national and state certifications, accreditations and permits held by the company, including:

- NELAP
- Department of Defense Environmental Laboratory Accreditation Program (DoD ELAP)
- ISO/IEC 17025:2005 Certificate of Accreditation
- Non-NELAP, State-Specific Programs

SGS Accutest operates seven laboratories and 14 service centers nationwide.

Our courier fleet can provide convenient sample pickup and container delivery to your location when needed. All couriers are SGS Accutest employees with experience in handling environmental samples and sample documentation.

**LabLink®**

## A CULTURE OF PERFORMANCE

Our clients expect consistent timeliness, accuracy and ease – and we deliver it. Our data reporting is an excellent example. Through on-time data delivery combined with archived historical data, clients can easily access project data any time it’s needed, confident that the data is an accurate representation of the sample and complies with state and federal requirements.

Our user-friendly data reports can be produced in several formats, from basic results to full Level IV – validatable deliverables, depending on client needs. In addition, both hard copy formats and fully indexed electronic documents are available. SGS Accutest specializes in electronic data delivery which includes numerous electronic products and delivery options to simplify data management and review.

## Hardcopy

- Full Deliverables – Comprehensive, Validation Ready (Level 4)
- Reduced Deliverables – Summary Data with Quality Control (Levels 2 & 3)
- Standard Commercial Format – Results Only (Level 1)
- State-Specific Formats

## Electronic

- Commercial Database Import Formats (i.e. EQUIS, GIS/Key and many others)
- Custom Spreadsheet Reports
- Regulatory Required EDD Formats (State and regional formats, i.e. NJ TECHREG)
- Department of Defense (ADR, SEDD, IRPIMS and others)

## Interactive, Online Reporting

- LabLink®
- e-Hardcopy: fully navigable, indexed, interactive PDF report
  - Available via Auto-email or online
  - Fully bookmarked with smart links

## INDUSTRY – LEADING TECHNOLOGY THAT GIVES YOU AN EDGE

We're proud of the leading role we've played in advancing industry standards. Nowhere is this more evident than in our innovative IT services. We provide the most comprehensive online service in the industry, which means greater ease and efficiency for our clients.

Our revolutionary Laboratory Information Management System (LIMS) is the most critical tool in the operation of our laboratories. Virtually everything from sample receipt to sample disposal is tracked through LIMS. Inter-laboratory coordination is guaranteed through all SGS Accutest facilities by operational standardization to the same LIMS.

As a standard part of our analytical data services, SGS Accutest offers LabLink®, a proprietary online data service with unprecedented power and ease of use. From the moment your samples are received, LabLink® gives you real-time, anytime access to job information right from your computer, saving you time, effort and money. In addition, LabLink® houses a database of more than 1 billion results to empower clients with easily accessible data.

With LabLink®, you have access to:

- Summary Tables comparing project results to multiple regulatory limits in real time
- Automated sample receipt confirmation
- Complete, real-time status updates of each project, every sample and every test
- Electronic Data Deliverables (EDDs) on demand around the clock for single or multiple jobs
- Immediate access to test results the moment they are approved by the laboratory
- Up-to-the minute financial data that features on-demand, downloadable project cost summaries, invoices, prices and historical billing data
- Online data comparisons to user-selected state and federal regulatory compliance limits

---

**SEAMLESS INTERACTION WITH PROJECT MANAGEMENT STAFF HELPS YOU MEET YOUR GOALS**

---

The caliber of service a company provides often determines whether a customer becomes a return customer. At SGS Accutest, our goal is to provide service that exceeds our clients' expectations. The result? More than 85% of our clients are repeat clients.

Our clients know that they can count on us to anticipate, address and resolve the challenges they face. This is made possible, in large part, because of our project managers. These hands-on professionals serve as an extension of your team, working closely with you throughout the project life cycle. At each phase, they provide expertise and support to simplify your job. And, they ensure all program objectives are met by obtaining a thorough understanding of all relevant regulatory, technical, data reporting and contractual requirements.

This proactive service and open communication develops trusted client partnerships, which in turn leads to successful project outcomes for the user.
